Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 June 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gonzalez et al. (Pub. No. US2005/0088445) in view of Anderson et al. (Pub. No. US2005/0910536)

As per claims 1, 8 and 15, Gonzalez discloses a PCI-Express slot for coupling devices to a host system comprising: a PCI-Express connector (fig.6, 220 ie chipset) that can couple at least two devices (fig.6, 670 ie graphics cards) using at least two independent PCI-Express lanes (fig.6, 671 ie PCI Express). (paragraphs 28, 67-68, ie chipset supports 32 PCI Express lanes with being routed into two x16 PCI Express graphics slots) Gonzalez discloses all the limitations as above except connector for receiving a card to couple two set independent set of PCI-Express lanes without using a PCI-Express bridge. However, Anderson discloses docking module couple to expansion module as show in figure 10. In addition, referring figure 7 & 8 PCI Express lanes 266 provided to connect to adapter slot 165, one PCI Express lane to a switch and one PCI Express lane for a USB hub as discloses in paragraph 52. It would have been obvious to one having ordinary skills in the art at the time the invention was

made to incorporate Anderson's teaching into Gonzalez's system so as for making expansion of PCs easier and that enables OEMs to deliver an entry-level PC that is upgradeable while maintaining stability. (paragraph 7)

As per claims 2, 9, 16, Gonzalez discloses where four PCI-Express lanes are used to couple at least two PCI Express devices. (paragraph 28)

As per claims 3, 10, 17, Gonzalez discloses where eight PCI-Express lanes are used to couple at least two PCI Express devices. (paragraph 28)

As per claims 4, 11, 18, Gonzalez discloses where twelve PCI-Express lanes are used to couple at least two PCI Express devices. (paragraph 28)

As per claims 5, 12, 19, Gonzalez discloses where sixteen PCI-Express lanes are used to couple at least two PCI Express devices. (paragraph 28)

As per claims 6, 13, 20, Gonzalez discloses where thirty two PCI-Express lanes are used to couple at least two PCI Express devices. (paragraph 28)

As per claims 7, 14, 21, Gonzalez discloses where .times.2, .times.4, .times.8, .times.12, .times.12, .times.16 or .times.32 PCI-Express lane configurations are used to couple at least two PCI Express devices. (paragraph 28)

Response to Amendment

3. Applicant's amendment filed on 6/14/07 have been fully considered but are moot in view of the new ground(s) of rejection.

a. In response to applicant's argument that Kelly do not disclose connector for receiving a card to couple two set independent set of PCI-Express lanes without using a PCI-Express bridge. However, Anderson discloses docking module couple to expansion module as show in figure 10. In addition, referring figure 7 & 8 PCI Express lanes 266 provided to connect to adapter slot 165, one PCI Express lane to a switch and one PCI Express lane for a USB hub as discloses in paragraph 52. Thus, the prior art teaches the invention as claimed and the amended claims do not distinguish over the prior art as applied.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
